

Friday March 12 <sup>th</sup> , 2010	Lecture Hall V 01:30 pm - 04:15 pm	Session 59 Symposium	
---	---------------------------------------	-------------------------	---

## Immunomodulatory Therapy of Sepsis - The Next Great Advance?

**Moderators:** Edward Abraham, Birmingham, USA  
Richard S. Hotchkiss, St. Louis, USA

- |               |               |  |
|---------------|---------------|--|
| 01:30 - 01:50 | <b>SY 481</b> | Overview of Potential Immunomodulatory Therapies - Pitfalls and Promises<br>Edward Abraham, Birmingham, USA                                      |
| 01:50 - 02:10 | <b>SY 482</b> | Fetuin-A Protects Mice against Lethal Sepsis by Modulating Endotoxin-Induced HMGB1 Release and Autophagy (A 283)<br>Haichao Wang, Manhasset, USA |
| 02:10 - 02:30 | <b>SY 483</b> | Discovery of a Natural Antagonist of Macrophage Migration Inhibitory Factor (MIF) (A 284)<br>Yousef Al-Abed, Manhasset, USA                      |
| 02:30 - 02:50 | <b>SY 484</b> | T-Regulatory Cells in Sepsis<br>James Lederer, Boston, USA   |
| 02:50 - 03:10 | <b>SY 485</b> | Modification of Co-Stimulatory/Inhibitory Molecules in Sepsis (A 285)<br>Alfred Ayala, Providence, USA   |
| 03:10 - 03:30 | <b>SY 486</b> | Cytokine Based Therapies as Anti-Apoptotic and Immunomodulatory Agents in Sepsis<br>Richard S. Hotchkiss, St. Louis, USA                         |
| 03:30 - 03:50 | <b>SY 487</b> | Development of New Immunotherapeutic Compounds: An Industrial Perspective<br>James C. Keith Jr., Cambridge, USA                                  |

*Under the Auspices of the Shock Society*
